DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1 and 21 are rejected under 35 U.S.C. 102(e) as being anticipated by Tarrant (US 2002/0128939).

Tarrant teaches a method and system for sharing investor information over an electronic network, comprising:

As per claims 1, 21 and 23,

- a) an inquiry receiving component for receiving an inquiry from the seeking entity (Abstract; [0018] – [0022]);
- b) a response receiving component for receiving a response indicating an existing relationship between the sought entity and an intermediate entity (Abstract; [0015]; [0018] – [0022]; [0026]; [0036] – [0038]; [0079] – [0083]);
- c) a confirming component for confirming, based on the response, that the new relationship may be established (Abstract; [0018] – [0022]).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-12, 22, 24, 29-30 and 35-36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tarrant in view of Krysiak et al. (US 2002/0078003).

As per claims 2-12, 22, 24, 29-30 and 35-36, Tarrant teaches all the limitations of claims 2-12, 22, 24, 29-30 and 35-36, except for specifying the degree of separations between the entities.

Krysiak et al. teach a method and system for identifying information sources based on one or more trust networks associated with one or more knowledge domains, wherein the multiple path connections is provided for identifying the most trusted path connection (Figs. 11-14; [0070] – [0076]).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Tarrant to include identifying multiple path connections because it would allow users to collect the most trusted information about sought entity.

As per claims 13-20, 25-28, 31-34 and 37-39, Tarrant and Krysiak et al. teach all the limitations of claims 13-20, 25-28, 31-34 and 37-39, except for plurality of entity roles, wherein each respective role in the plurality of roles defines a respective function that one entity fulfills to another entity.

Smith et al. teach a method and system for controlling a lifestyle of an electronic contract for a business relationship, wherein roles are associated with business relationship elements (Abstract; [0018]).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Tarrant and Krysiak et al. to include associating roles with business relationship so that each respective role defines a respective function that one entity fulfills to another entity, because it would increase the degree of trust of users in conducting business over the computer network using a mechanism that tie the business relationship to terms and conditions of a legal contract (Smith et al. [0007]).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure (see form PTO-892).
